Please email the following individual 24-hours before work will start. Please make the email subject line as follows: 'Permit Activation Notice (insert App ID No. below)' (385) 248-8148 79997 Darren Vincent darrenvincent@utah.gov

An Encroachment Permit is hereby authorized subject to Utah Administrative Code R930-6, R930-7, and any other applicable laws or regulations. By performing the activities authorized by this permit, the permittee agrees to strictly comply with all permit terms, conditions, and limitations (TC&L's), including any attachments submitted with the application. Failure to abide by all permit TC&L's, or any term set forth by this permit, is grounds for immediate verbal stop work order, written stop work order, permit revocation, the restriction of future permits, or other legal or equitable remedies.

In the event work is commenced under this permit and the permittee fails or refuses to complete the work, including performing substandard work, UDOT may, at its discretion, order the permittee to stop work and UDOT may correct any deficiencies or otherwise complete the permitted work at the expense of the permittee. Upon the receipt of an invoice for any costs, including all inspection costs, incurred by UDOT, the permittee shall immediately pay the amount due. If an action is required to be filed in court to collect the amount due, the permittee shall be liable for UDOT's costs and fees, including attorney fees. The permittee will strictly comply with the traffic control standards and warn the public of said work within UDOT's right-of-way to protect the traveling public and all personnel authorized within the permitted work zone. When traffic control is required, the permittee will not pre-stage any vehicles, equipment, personnel, or materials within any portion of UDOT's right-of-way until the required traffic control is in place. By accepting this permit, the permittee shall defend, indemnify, and hold harmless UDOT, its employees, consultants, contractors, agents, and the State of Utah, from all damages or claims, including attorney fees, arising out of the work performed under this permit by permittee, permittee's employees, agents, consultants, contractors, or subcontractors.

**ENCROACHMENT PERMIT** 

## PERMIT TERMS, CONDITIONS, AND LIMITATIONS

- 19. No saw or pavement cuts permitted on this job.
- 20. Licensee must place material such as road base, slag, gravel, etc. a minimum of 6" thick between edge of pavement and property line to prevent tracking onto the highway.
- 21. ATSSA Certified Traffic Control Maintainer required.
- 22. Licensee must comply with all environmental issues to include cultural & paleontologist clearances (see attachment "F").
- 23. See Attachment "F".

STATEWIDE UTILITY & ENCROACHMENT PERMITTING

- 24. When a hazard is within the work clear zone and the vertical grade separation is 6" or greater or a slope steeper than 4:1, a UDOT approved barrier system is required.
- 25. If paving is done after Oct. 15 and before Apr. 15, licensee must replace temporary repair work when temperature and weather conditions are such that asphalt pavement can be placed in accordance with state specifications. In all instances, cold mix must be replaced with hot mix.
- 26. All work must comply with current ADA standards.
- 27. Notify UDOT upon completion of project for inspection.
- 28. An inspector may be required at permittee's expense, with 48 hours notice. By accepting this permit, I agree to pay for inspection fees.
- 29. Licensee is responsible for repairing and/or restoring any portion of the roadway damaged during construction.
- 30. Licensee must restore shoulder of highway to its original or better condition. Including reseeding, replacing sidewalk, fencing, pipe, culverts or signs removed or damaged during construction and any other roadway features.
- 31. All work must be completed by 12:00 PM prior to any Holiday and shall not commence until 8:00 AM on the following work day.
- 32. Licensee shall keep highway free of mud and debris. A sweeper broom must be accessible for cleaning purposes.
- 33. The depth of bury for all utility facilities under pavement shall be a minimum of four (4) feet below the top of pavement or existing grade including open drainage features. Where utility facilities are installed within 20 feet from the edge of pavement, the depth of bury shall be a minimum of five (5) feet below top of grade so as to allow for installation of UDOT signs or delineators. Utility facilities under sidewalks shall be installed a minimum of three (3) feet below the top of sidewalk.
- 34. No storage of backfill material or pipe will be allowed within the ASHTO Clear Zone. Excavations must be backfilled daily or barrier will be required.
- 35. Permit Holder will comply with all applicable environmental laws.
- 36. Upon completion of project, contact the inspector as listed on this permit .
- 37. A copy of the permit must be present at the encroachment site for the entire encroachment period.
- 38. By the accepting this permit, the Applicant acknowledges the hazardous nature of the work and agrees to assume full responsibility in the event of an accident or other incident involving death or injury to members of the Permitess Group or others, or property damage that results from negligence or intentional conduct on the part of any member of the group.
